Layyah, Pakistan

Education

2017 – 2021

BS Computer Science

University of Sargodha

CORE SKILLS

AI & Automation

- n8n Workflow Automation
- AI Integrations (OpenAI, Claude, Gemini)
- Axiom Browser Bot
- Automa Chrome Automation
- Webhooks, API Automation
- AI Content Pipelines
- Automated Reports & PDF Systems

Backend Development

- Laravel, PHP
- REST APIs, GraphQL
- Microservices
- Authentication & Webhooks

Frontend

- React.js, Next.js
- Vue.js, Livewire, Alpine.js

Database & DevOps

- MySQL, Firebase
- Docker, AWS (S3, EC2, RDS)

Language

- English
- Urdu

About Me

AI Automation Engineer and Senior Full Stack Developer with 5+ years of experience delivering scalable applications and automation systems for global clients. Specialized in building AI-driven workflows, n8n automations, browser bots (Axiom, Automa), and Laravel-based APIs. Strong focus on process automation, AI-enabled content pipelines, and integrating LLMs (OpenAI, Claude, Gemini) with real business systems.

Featured AI Projects

AI YouTube Content Factory (n8n + LLM)

- Automated pipeline generating titles, descriptions, tags, and scripts from a single topic.
- Saves outputs to Sheets/DB and sends via email/Telegram.
- Reduces content creation time by 90%.
- Tech: n8n, OpenAI/Claude, Webhooks, Google Sheets, Laravel.

AI Invoice Automation System

- Laravel order → AI formatting → PDF invoice → automated email delivery.
- Stores PDFs in Drive and logs metadata into database.
- Tech: n8n, LLM API, MySQL, PDF generator.

Browser Automation Bot (Axiom + Automa)

- Automates scraping, form submission, data extraction & repetitive tasks.
- Uses AI to refine extracted data and create actionable output.

Professional Experience

2022 – 2025

Remote Senior Full Stack Developer — Gorin Systems (USA)

- Built high-performance Laravel + React applications for enterprise clients.
- Designed scalable REST/GraphQL APIs and improved backend performance by 40%.
- Delivered cloud deployments on AWS with CI/CD pipelines.
- Collaborated with cross-timezone US teams.
- Utilized AI-assisted development (OpenAI/Claude) to accelerate code generation, troubleshoot complex issues, optimize functions, and document APIs, reducing development time by 25–35%.

2021 – 2022

Full Stack Developer — BJS Soft Solution (Pakistan)

- Developed end-to-end applications using Laravel + React.
- Reduced load time by 35% with API optimization.
- Led mentoring and code-review sessions.
